

Everything POSSible !

The New **Codexxa** From Comtrex

Finally... a HandHeld that is JUST big enough to USE !

The new Comtrex **Codexxa** is a wireless tablet PC with a bright, 8.4" LCD display with a resolution of 800x600. Powered by an AMD Geode LX800 processor, the **Codexxa** runs under XP embedded from a 1GB Flash Disk.

With a total weight of 2.7 lbs, including the protective jacket and the standard external battery pack, the **Codexxa** will provide over four hours of wireless, handheld operation. When the battery is low, simply "hot-swap" on a new external battery for another four hours of operation.

Best of all . . . with the same screen resolution as the 12.1" Odyssey terminal, the **Codexxa** will display the exact same desktops as the Odyssey and runs the exact same application program!

The **Codexxa** provides wireless HandHeld operation, on a diskless, fanless tablet platform, under an XP operating system, using the exact same proven application program as the Odyssey terminal!

Comtrex **Codexxa** – The Perfect Combination of Size and Power !

Everything POSSible !
