

Retail Series

R500 Multi-Till

A leading provider of cash management solutions for the retail, food service and financial industries, Tellermate Group has more than 250,000 systems in use worldwide.

Tellermate's TY+ Retail Series sets the standard for best practice cash management, maximizing productivity and increasing cash management efficiency. The TY+ Retail Series offers simple cash reconciliation functions for coins and bills.

TY+ gives you the power and flexibility to monitor and manage cash more efficiently.

TY+ R500 Multi-Till benefits

- **Dramatically speeds cash management**
- **Conduct spot checks and pickups**
- **Release valuable management time**
- **Improve accuracy and secure cash revenues**
- **Reduce discrepancies**

TY+ dramatically speeds till, start bank, safe and back office reconciliation. In a single count, TY+ verifies the correct totals for every denomination throughout your retail store enterprise.

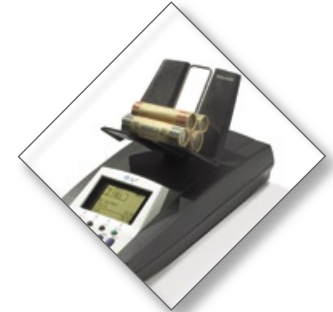

TY+ R500 Multi-Till main features

- Allows you to count a till and prepare a bank in one operation in under a minute.
- Counts bills (loose, strapped or clipped) and coins (loose or rolled) on the same platform.
- Counts non-cash items by value and number including Checks, Credit and Debit card payments. Alpha numeric keypad facilitates key entry for non-cash items including Checks, Visa, Mastercard and coin dispenser values for full accounting.
- Multiple till memory capacity, allowing data to be stored by till for up to 100 tills.
- Four count types: Closeout, Pickup, Deposit and Offline, allowing access to specific back office tasks. Offline count enables cash to be counted, without adding to the grand total (i.e. spot audits).
- Facility to view and amend individual till data, eliminating the need to recount, as well as print, send to PC or clear all till data.
- Provides extra print facility for multiple till transactions.
- Dual currency facility allows two currencies to be counted simultaneously.
- Built in tutorial providing step-by-step visual support enhances continuous training.
- Two RS232 ports for simultaneous link to PC and printer.
- One USB port for data transfer directly to PC.

TY+ R530 Multi-Till additional features

- Ethernet TCP/IP network interface for data transfer to computer network, enhancing auditability. Software upgrades can easily be rolled out across the entire network.

Turnover for full TY+ R500 and R530 features

TY+ main features

Counts bills and coins	Counts bills (loose and bundled) and coins (loose and rolled) on the same platform, allowing flexibility to select wrap types.
AutoAdd and AutoScroll	For rapid systematic counting.
Count summary screen	Allows all count information to be reviewed quickly by denomination, reducing valuable time spent reconciling discrepancies.
Coupon Wizard	Allows coupons to be named, weights added and assigned individual values. Flexibility to select count type such as vouchers and coupons. Pre programmed naming facilitates quicker and more efficient cash counting.
Dual currency facility	Counts two currencies simultaneously.
On-board Tutorial	Step by step visual tutorial and user support takes you through your first count and ensures counting success thereafter. Provides continuous training.
Consecutive Number	Allocates consecutive number to each print out provided, enhancing security and auditability.

TY+ R500 MultiTill additional features

Maximum 100 till memory	Multi till memory capacity allows data to be stored by denomination by till for up to 100 tills. Record an entire day's activity per till, per denomination for end-of-day reconciling, totalling and transferring to back office systems.
Store and recall individual bank value for every till counted	Store the individual values of each till so that banks need be set only once.
Amend facility for correction of discrepancies	Facility to view and amend individual till data as well as print, send to PC or clear all till data.
Extra print facility for Multiple till transactions	Printout options include grand total, all tills, grand totals, all non-cash, check list, all tills in brief etc.
Next day count facility	Facility to account for previous day's cash takings, next day, recording date money received and date counted
Three reference numbers per count	Three reference numbers per count: Till, Cashier, Operator plus Store number. Reference numbers can be assigned against count type maximizing audit trail.
Facility to count up to 15 non-cash items	Pre programmable named non-cash items can be included in the cash count for quick and efficient revenue consolidation.
Alpha-numeric keypad	For keyed entries and edit purposes. Facilitates key entry for non-cash items including Check, Visa, Mastercard and coin dispenser values for full accounting.
Calculator with check add list function	Replaces desk-top calculator and provides accountability of all checks individually.
Ability to reconcile against a declared balance (z/x read)	Z/X read balance can be keyed in allowing cross reference of cash counted further enhancing the audit trail.
Two RS232 ports for simultaneous link to printer and PC	Provides simultaneous communications to printer and PC. Print outs eliminate use of cash sheets and create an accurate audit trail. PC connectivity provides direct cash reconciliation to PC.
One USB port for data transfer directly to PC	Gives alternative connectivity option for PC communications.
Four switchable count types	Closeout, Pickup, Deposit and Offline. Allows access to specific back office tasks which can be switched off if direct access is required. Offline count enables cash to be counted, without adding to the grand total.

TY+ R530 MultiTill additional features

Ethernet TCP/IP network interface for data transfer to computer network	With Ethernet integration, data can be transmitted directly into the network enhancing auditability via remote viewer access. Software upgrades can easily be rolled out across the entire network with a simple key press from retail head office.
